

RISHAB SOOD

Senior MEAN Stack Developer · Angular · Node.js · Express.js · MongoDB · TypeScript · AI-Integrated Applications
+91 9592006999 | rishabsood9@gmail.com | github.com/rishabsood9 | linkedin.com/in/rishabsood | Gurgaon, India · Open to Remote

SUMMARY

Senior MEAN Stack Developer with **6+ years** building scalable, high-performance web applications for global enterprise clients across **healthcare, fintech, energy, and private equity** domains. Deep expertise across the **MEAN stack — MongoDB, Express.js, Angular (2–16), and Node.js**, with strong **TypeScript** fundamentals. Proven ability to own features end-to-end in agile squads, integrate complex **microservice backends**, and ship production-ready full-stack code. Experienced in remote collaboration with **US-based clients** and actively building **AI-integrated applications** using **Claude AI, LLM APIs**, and agentic workflows.

EDUCATION

B.Tech – Computer Science & Engineering · Guru Nanak Dev University, Amritsar Aug 2015 – May 2019

CORE COMPETENCIES

Angular **Node.js** **Express.js** **MongoDB** **TypeScript** **GraphQL** **REST APIs** **AWS**
Agile / Scrum **Microservices** **LLM API Integration** **Prompt Engineering** **Agentic AI** **Healthcare IT**
Fintech **CI/CD** **Docker**

TECHNICAL SKILLS

Frontend	Angular 2–16 (Standalone Components, Signals), TypeScript, JavaScript (ES6+), HTML5, CSS3/SCSS, RxJS, NGRX, Angular Material, Storybook, i18n, AJAX
Backend	Node.js , Express.js , RESTful APIs, GraphQL, RabbitMQ
Databases	MongoDB , SQL (MySQL / PostgreSQL), Couchbase, MinIO
AI & Agentic	Claude AI (CLI + VS Code), LLM API Integration, LangChain, Prompt Engineering, Agentic Workflows, Chatbot Agent Development, MCP
Cloud & DevOps	AWS, Jenkins, GitHub Actions (CI/CD), Docker, Datadog
Testing & Tools	Jest, Jasmine, Karma, Postman, Git, Jira, VSTS, VS Code
Methodology	Agile / Scrum, BDD, Code Reviews, Microservice Architecture

EXPERIENCE (6+ YEARS)

EPAM Systems

Remote / India

Senior Software Developer

Jan 2025 – Present

Client: iAlta — New York-based private equity trading platform startup (remote collaboration)

Private Equity Trading Platform

- **Angular Migration:** Spearheaded migration of legacy Angular modules to **standalone component architecture**, reducing bundle size by **~30%** and improving initial load performance by eliminating unnecessary NgModule overhead.
- **Domain Expertise:** Developed deep understanding of the **private equity and financial marketplace** domain through close collaboration with NY-based stakeholders — learning PE trading workflows, deal management, and compliance requirements to ensure solutions were precisely aligned with business needs.
- **Full-Stack Development:** Designed and implemented pixel-perfect, **responsive Angular interfaces** from wireframes and built the corresponding **Node.js / Express.js** REST endpoints with **MongoDB**, ensuring seamless data flow within a complex private marketplace domain.
- **Component Library:** Established and maintained a comprehensive **Storybook** component library with test cases, enabling isolated development, visual regression testing, and accelerating team onboarding.
- **Agentic AI:** Designed and developed an **AI-powered chatbot agent** (in testing) that reads form structures, intelligently converses with users to gather required information, and **auto-prefills forms** based on responses — reducing manual data entry effort. Leveraged **Claude AI** (CLI + VS Code) throughout the dev workflow for code generation and refactoring, improving sprint velocity by **~25%** in a lean 3-person agile squad.

Angular 16+	Node.js	Standalone Components	TypeScript	Storybook	Claude AI	Agentic AI	Chatbot Agent
LLM	REST APIs	Agile	Remote				

EXPERIENCE (CONTINUED)

CitiusTech

Senior Software Engineer

Gurgaon, India

Feb 2022 – Jan 2025

Client: DaVita — leading US-based kidney care and dialysis services provider

Patient Data Management

- **Domain Expertise:** Gained deep understanding of **US healthcare workflows** including patient registration processes, HIPAA compliance requirements, and clinical data standards — enabling precise, regulation-aware full-stack development.
- **Module Development:** Architected and delivered a **patient registration module** on the MEAN stack — Angular 16 frontend backed by **Node.js / Express.js** services and **MongoDB** — capturing personal health metrics, clinical specifics, and diagnostic data with intuitive **drag-and-drop** interactions for clinical staff efficiency.
- **API Design:** Designed and built RESTful **Node.js / Express.js** APIs and integrated them with the Angular frontend, ensuring robust data flow between client and distributed **AWS** cloud services.
- **Testing:** Authored unit test suites using **Jasmine** achieving high code coverage across all critical patient data capture workflows.

Angular 16	Node.js	Express.js	MongoDB	AWS	Jasmine	REST APIs	Healthcare IT	HIPAA
------------	---------	------------	---------	-----	---------	-----------	---------------	-------

Client: Arthrex — global medical device company specializing in orthopedic products

Responsive Media User Interface

- **Domain Expertise:** Acquired working knowledge of **medical imaging standards** including DICOM protocol and orthopedic device data workflows to deliver precise, compliance-ready full-stack features.
- **Media System:** Engineered a cutting-edge **Angular 12** media management system supporting **DICOM export**, multi-language **internationalization (i18n)**, and real-time **Datadog** performance monitoring.
- **Microservice Integration:** Built and integrated **Node.js / Express.js** microservices with **MongoDB**, **RabbitMQ**, and **MinIO** — owning both the Angular frontend and Node.js service layer for high-throughput, fault-tolerant media delivery.
- **Internationalization:** Implemented multi-language support enabling seamless usage for Arthrex's global clinical teams across **5+ languages**.

Angular 12	Node.js	Express.js	MongoDB	RabbitMQ	MinIO	DICOM	Datadog	i18n	Microservices
------------	---------	------------	---------	----------	-------	-------	---------	------	---------------

Nagarro

Software Engineer

Gurgaon, India

July 2019 – Feb 2022

Client: Engie — French multinational energy and utilities company

Automated Bill Consolidation

- **Domain Expertise:** Gained understanding of **energy billing workflows** and utility pricing models, enabling accurate implementation of complex consolidation logic.
- **Automation:** Engineered an **Angular + Node.js / Express.js** solution automating complex energy bill consolidation, leveraging advanced algorithms to eliminate manual effort and ensure calculation accuracy at scale.
- **State Management:** Implemented **NGRX** state management on the Angular client and optimised **Node.js** API consumption, reducing redundant network calls by **~40%** and delivering a measurably faster user experience.

Angular	Node.js	Express.js	MongoDB	NGRX	REST APIs	Energy
---------	---------	------------	---------	------	-----------	--------

Client: Blackbaud — US-based cloud software company serving the social good sector

CRM Feedback Tracker

- **CRM Development:** Developed a **real-time** web-based feedback form on the MEAN stack — Angular client backed by **Node.js / Express.js** APIs and **MongoDB** — with a live tracker, enabling accurate user query handling and streamlined CRM workflows.
- Worked across the full **SDLC** — development, testing, deployment, and ongoing service maintenance — ensuring high availability and reliability.

Angular	Node.js	Express.js	MongoDB	JavaScript	CRM	SDLC	Agile
---------	---------	------------	---------	------------	-----	------	-------
